Our Professional Development Workshops help nonprofit leaders and staff build the knowledge and skills they need to succeed, offering practical insights and actionable strategies they can put to work right away.

2027 SHARE Network Workshops

We will continue to offer two workshop tracks based on organization size to choose from in 2027 because of the overwhelmingly positive response from attendees this year! We also want you to find a group of colleagues from organizations across our community that experience some of the same things you do because of size of board/staff, age, experience or revenue. We hope this collegial "cohort" becomes a support system for you in many ways.
